

Age Friendly Northfield

Parker Johnson, Nina Sun, Jeanny Zhang

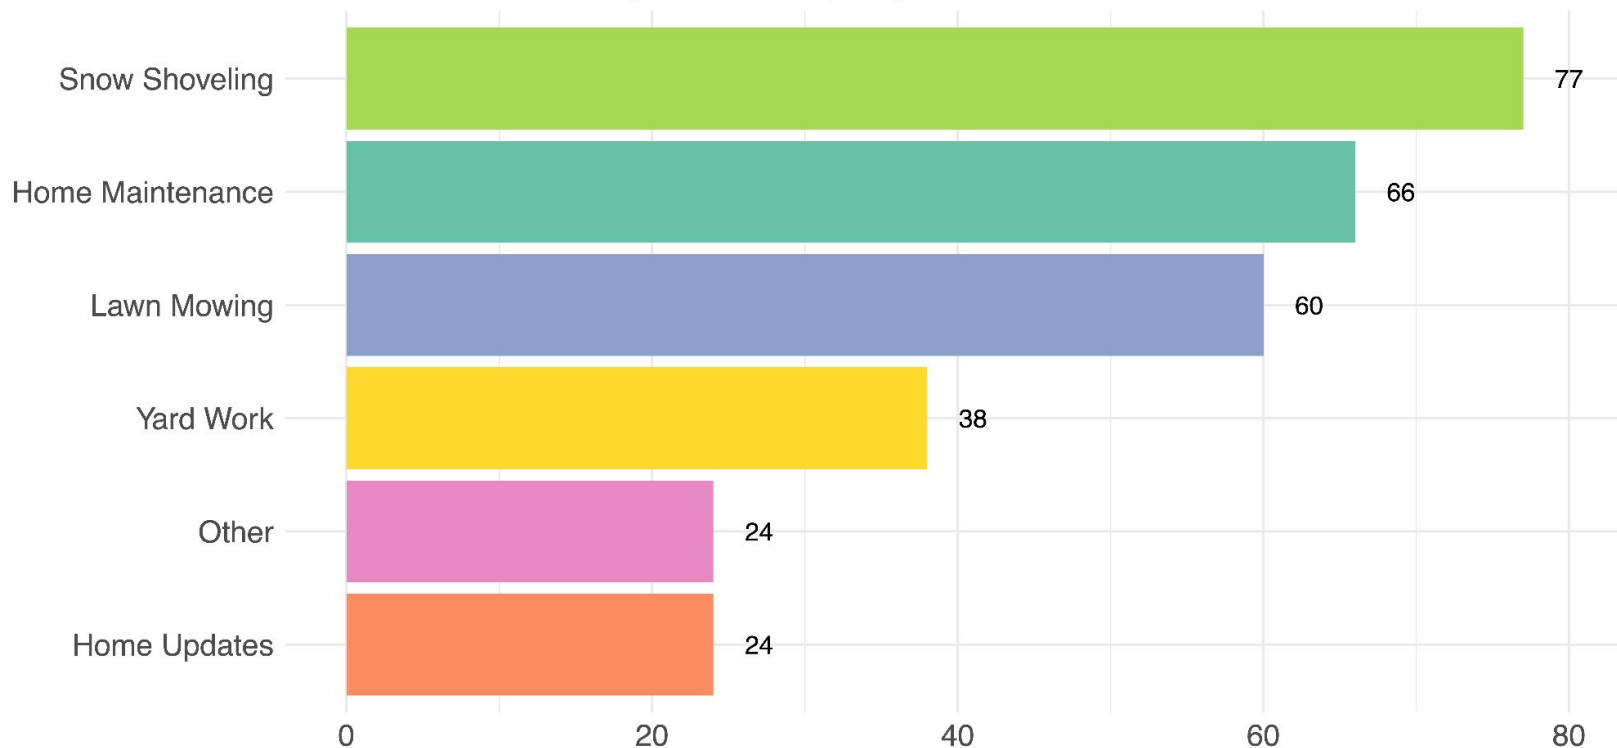

Main Goals

- Understand what service people are using and specifically what type within that category
- Understand what service people may need, but are not using, and why they aren't using it.
- Determine which services are most needed but not available.
- Determine what resources people use to find services.
- Determine which services are priority for development.

What services people are using

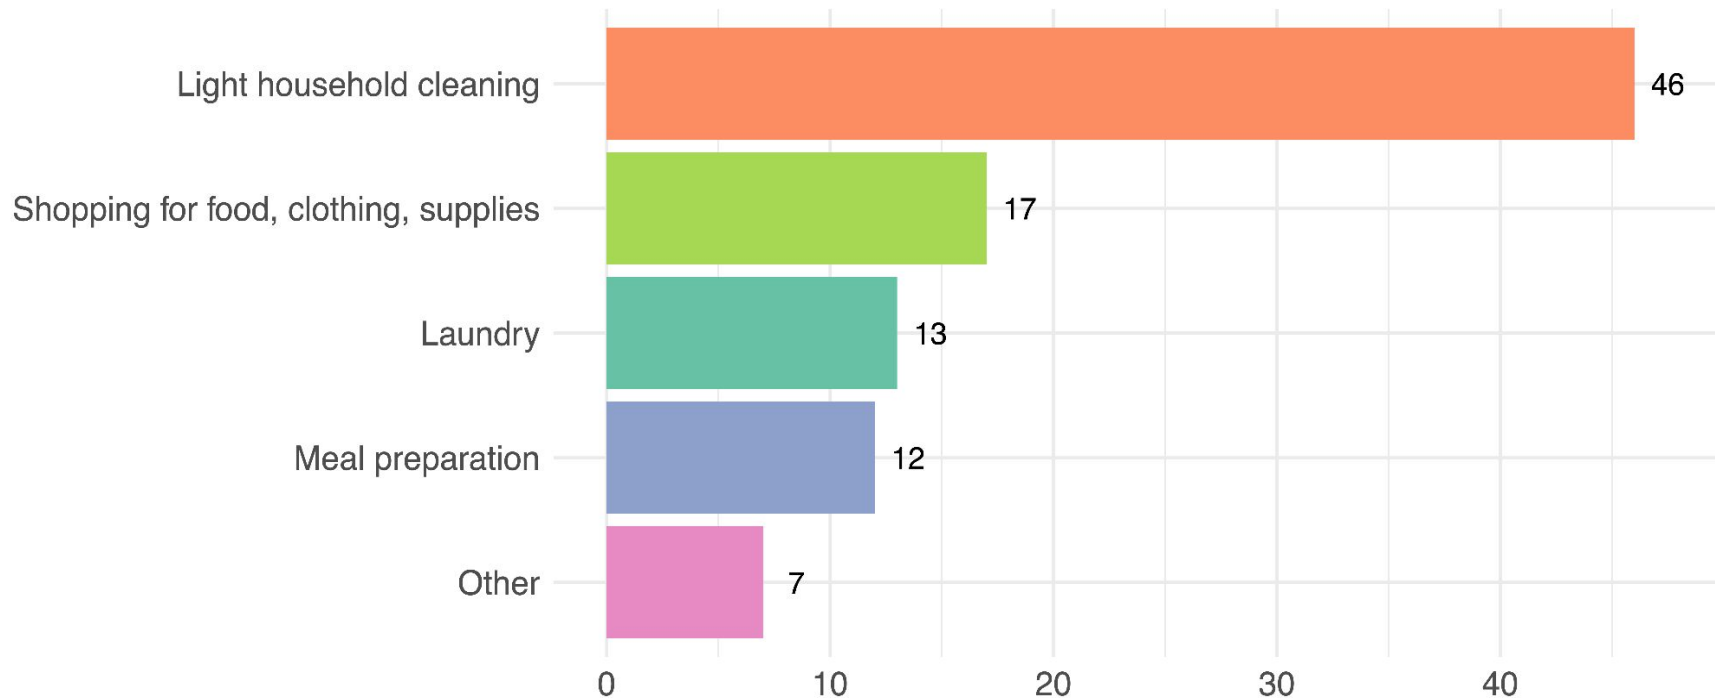

Chore services being used

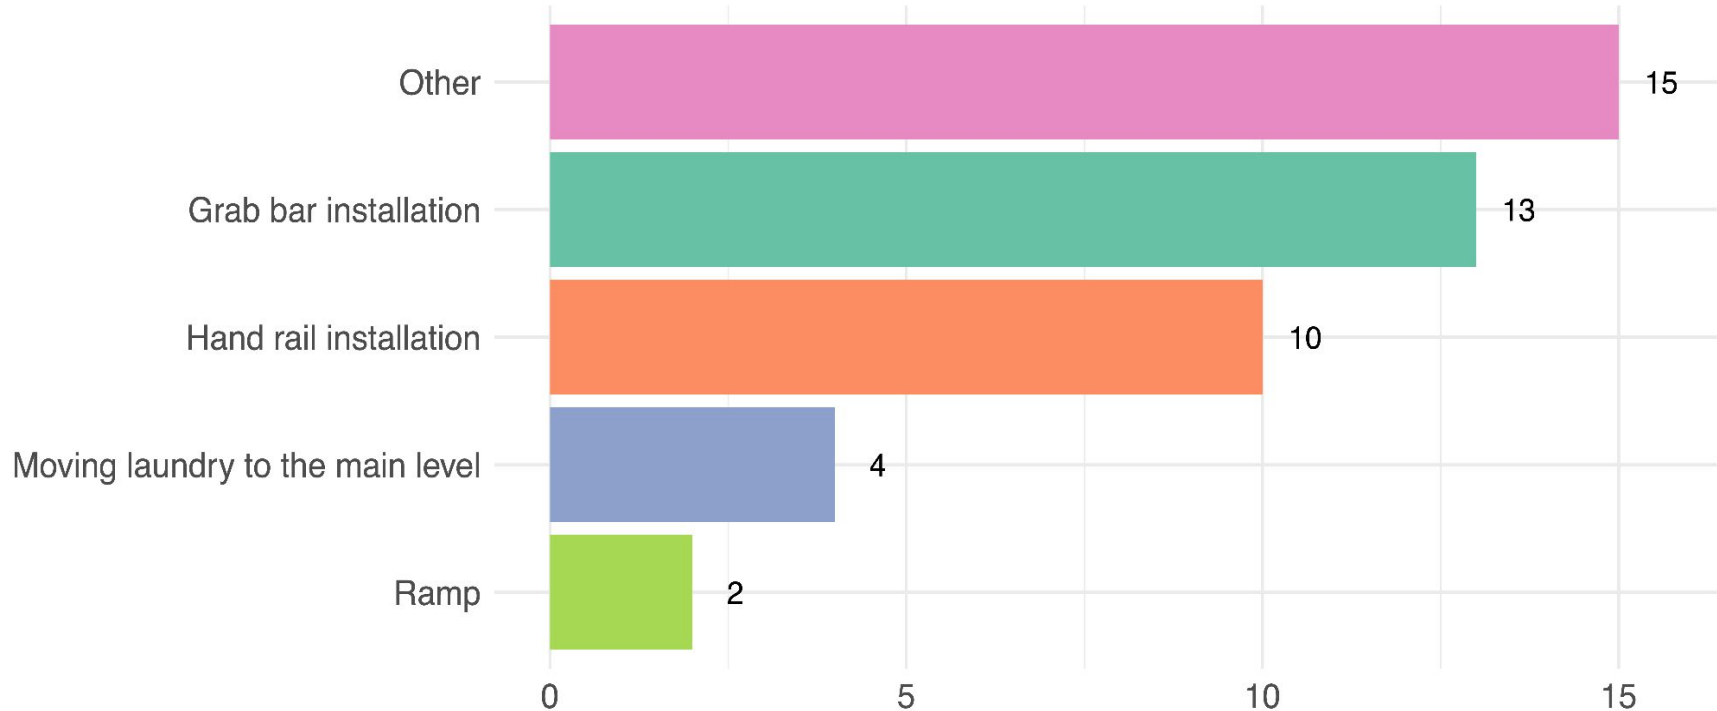

- The most common chore services are snow shoveling, home maintenance, and lawn mowing.
- 23 responses had text answers: 10 referred to house cleaning, 4 referred to handyman projects.

Homemaker services being used

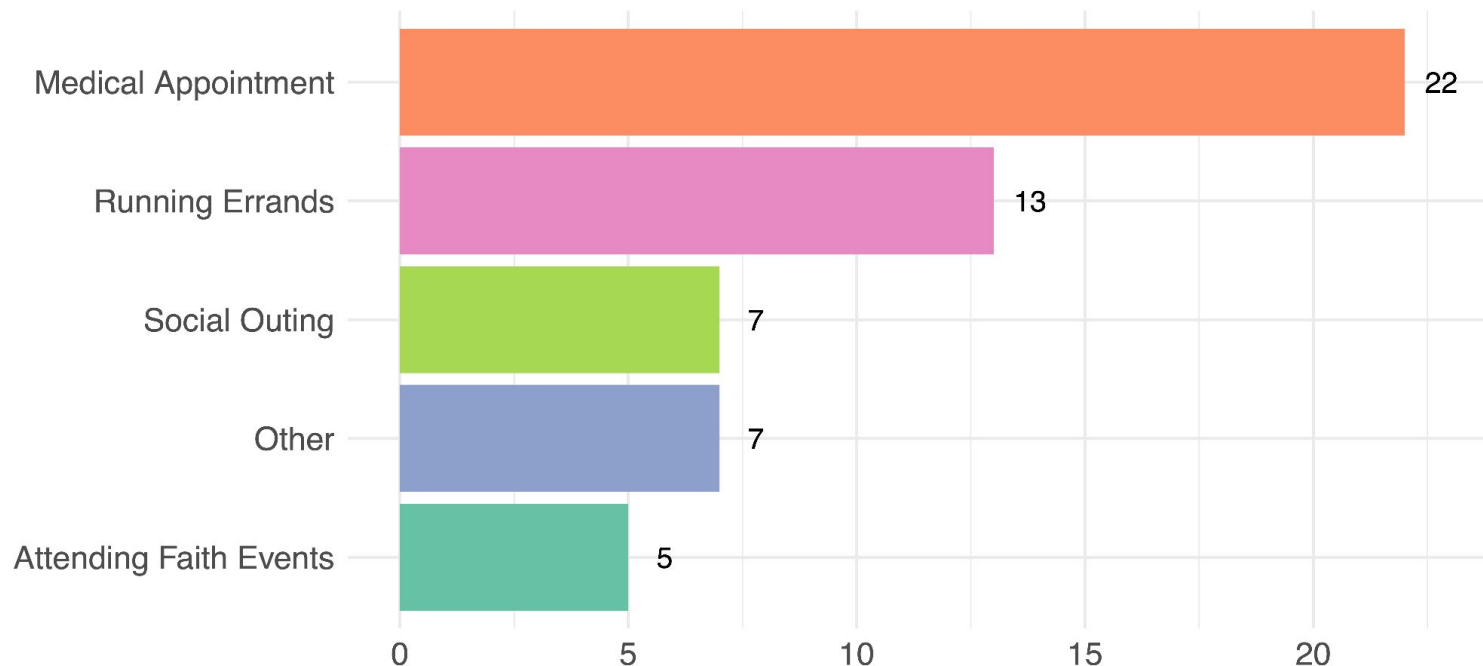

Light household cleaning stands out as being the most commonly used homemaker service.

Home Modification services being used

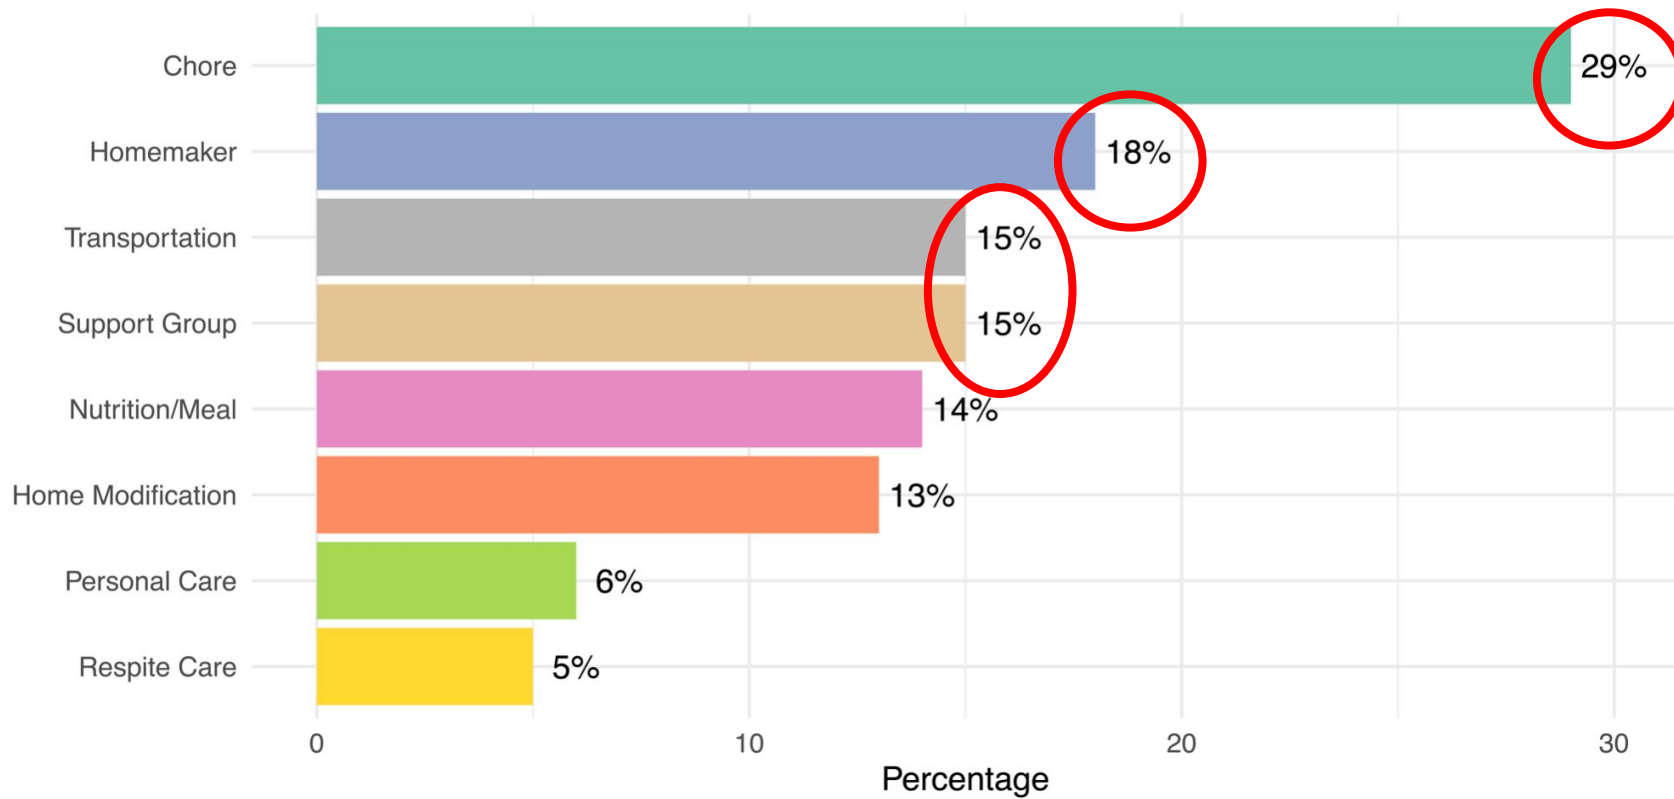

- Grab bar and hand rail installation are common home modification services being used.
- 15 responses had text answers: 2 referred to kitchen remodeling, 2 referred to lighting.

Transportation Services being used

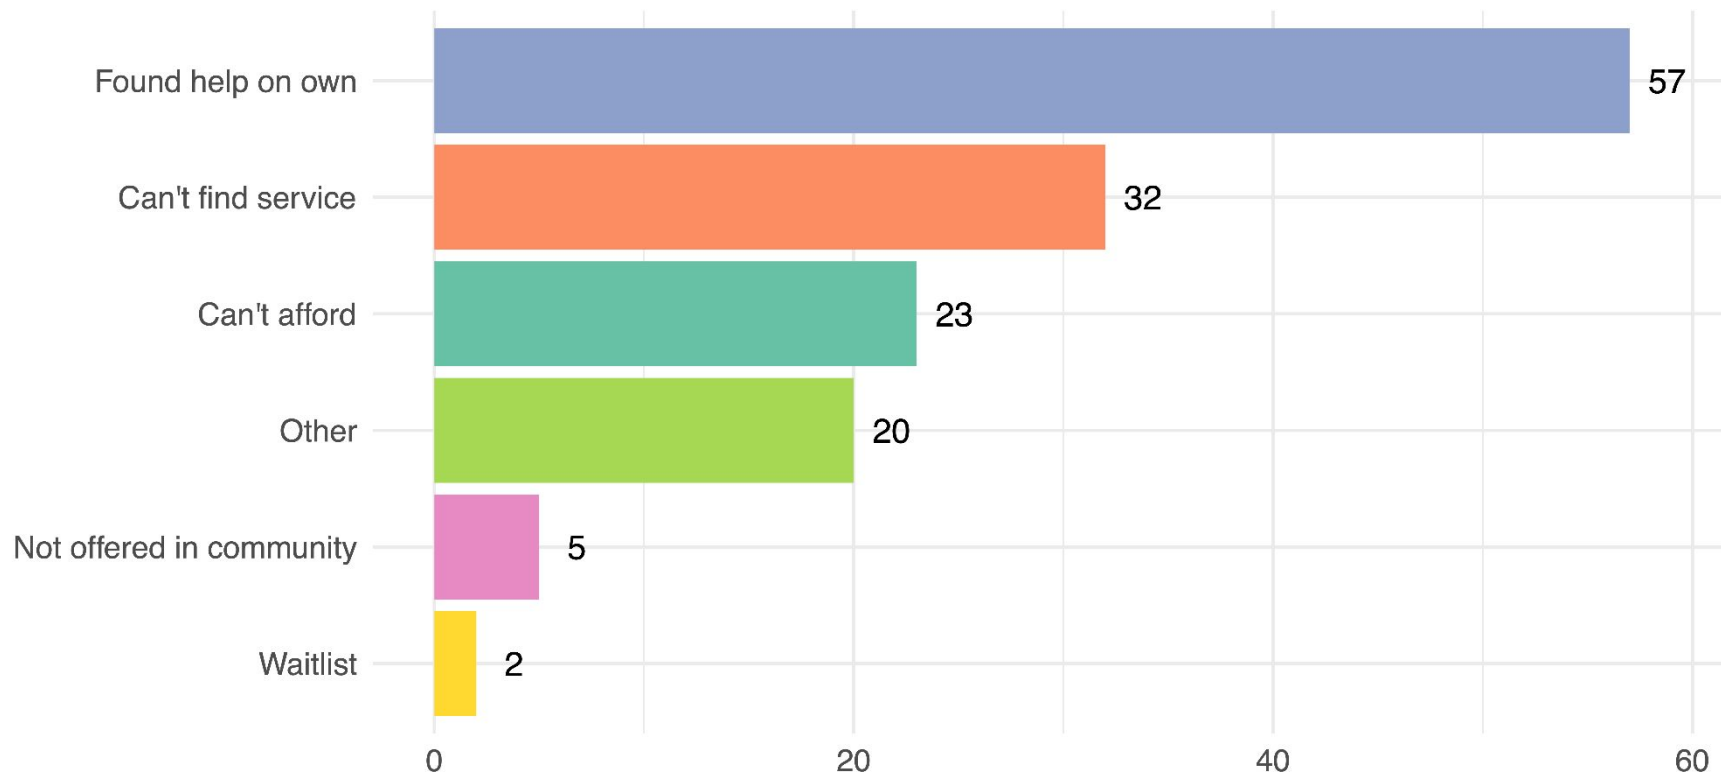

- Common reasons for using transportation services are for medical appointments and running errands.
- 3 of the 7 text responses mentioned runs to the airport.

Services people may need but are not using

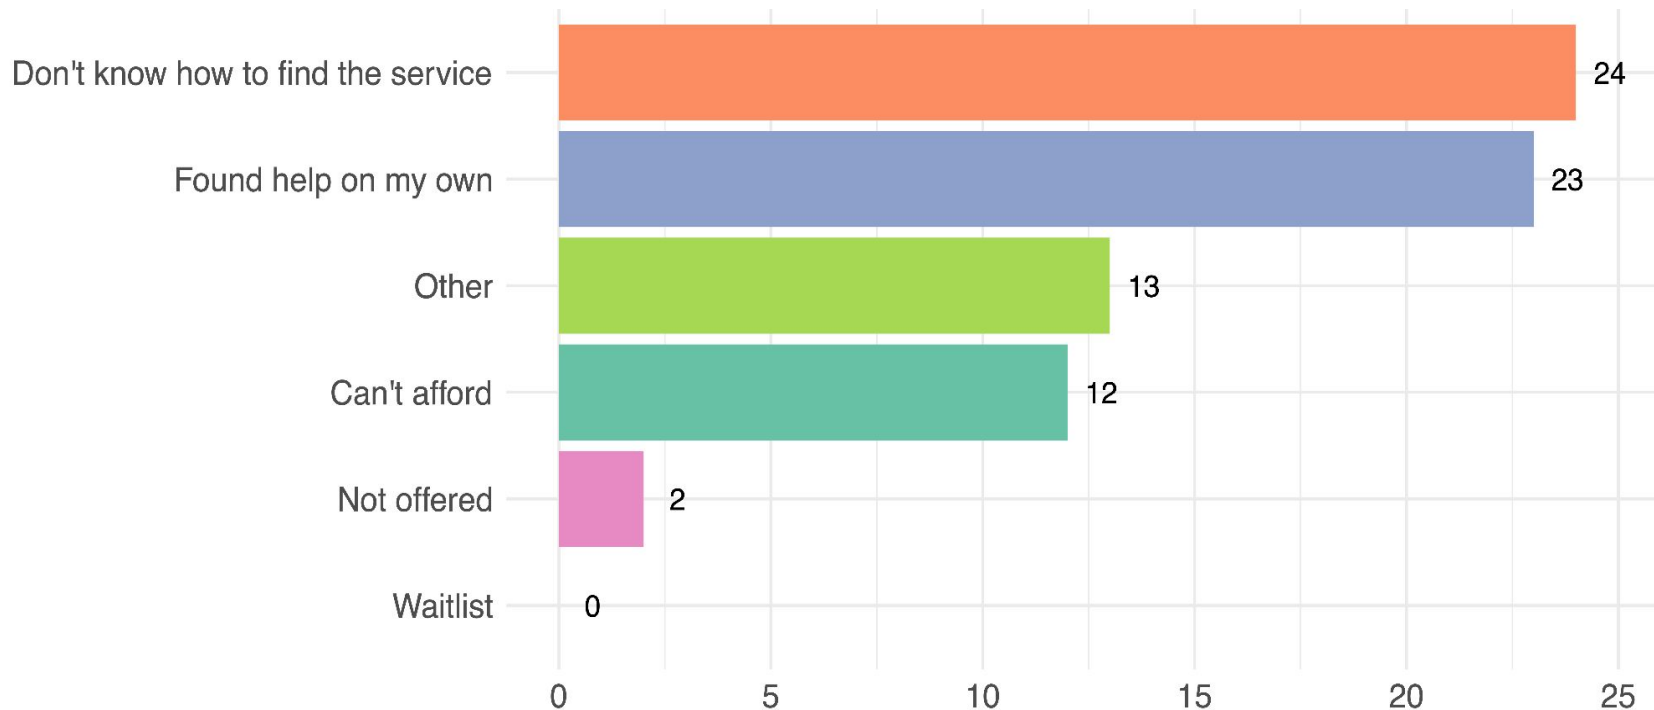

Chore services are the most needed but not used service.

Why people aren't using Chore Services

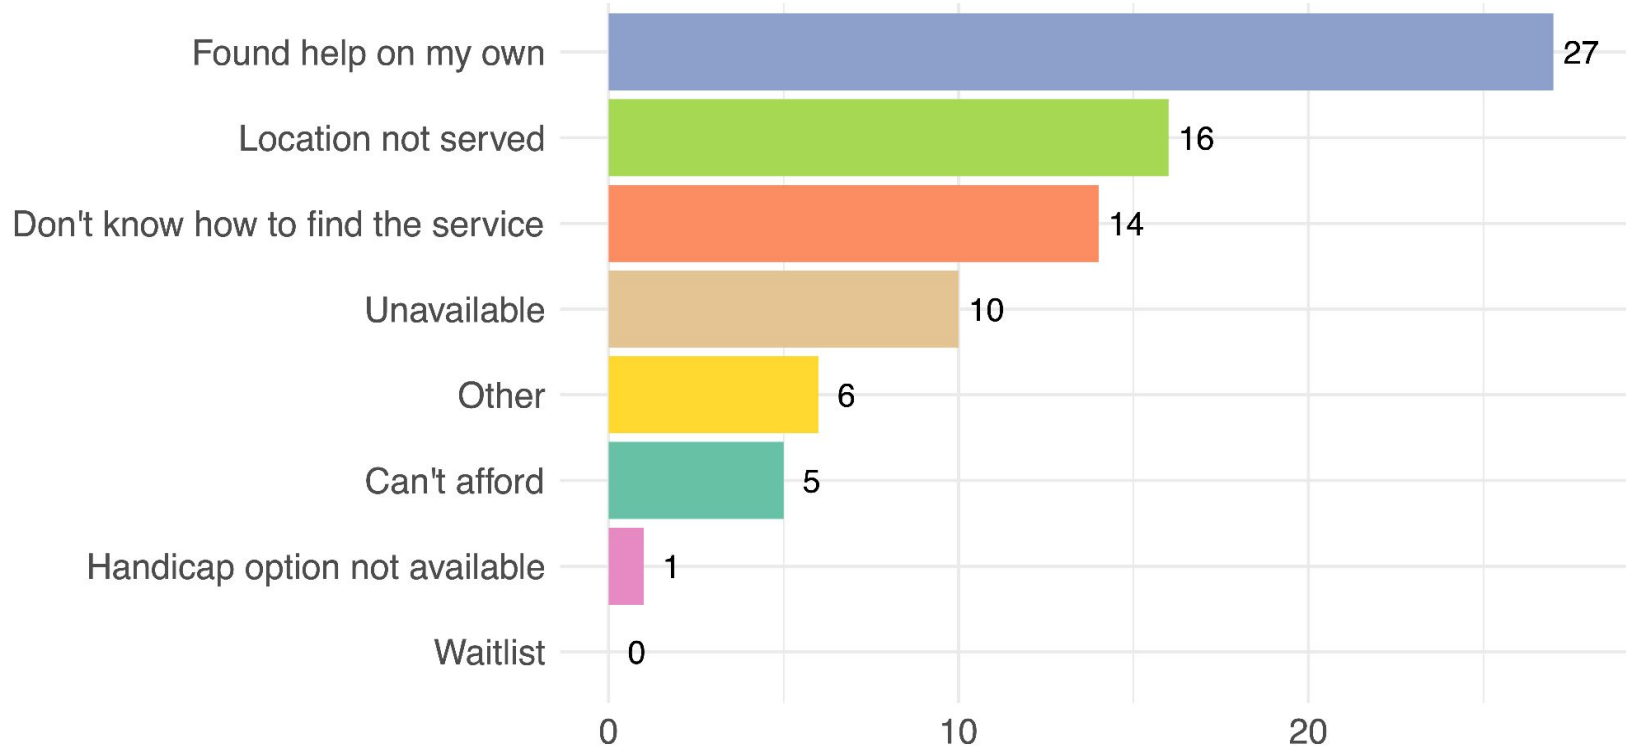

20 responses had text answers, 6 referred to people were busy / help not immediately available.

Why people aren't using Homemaker Services

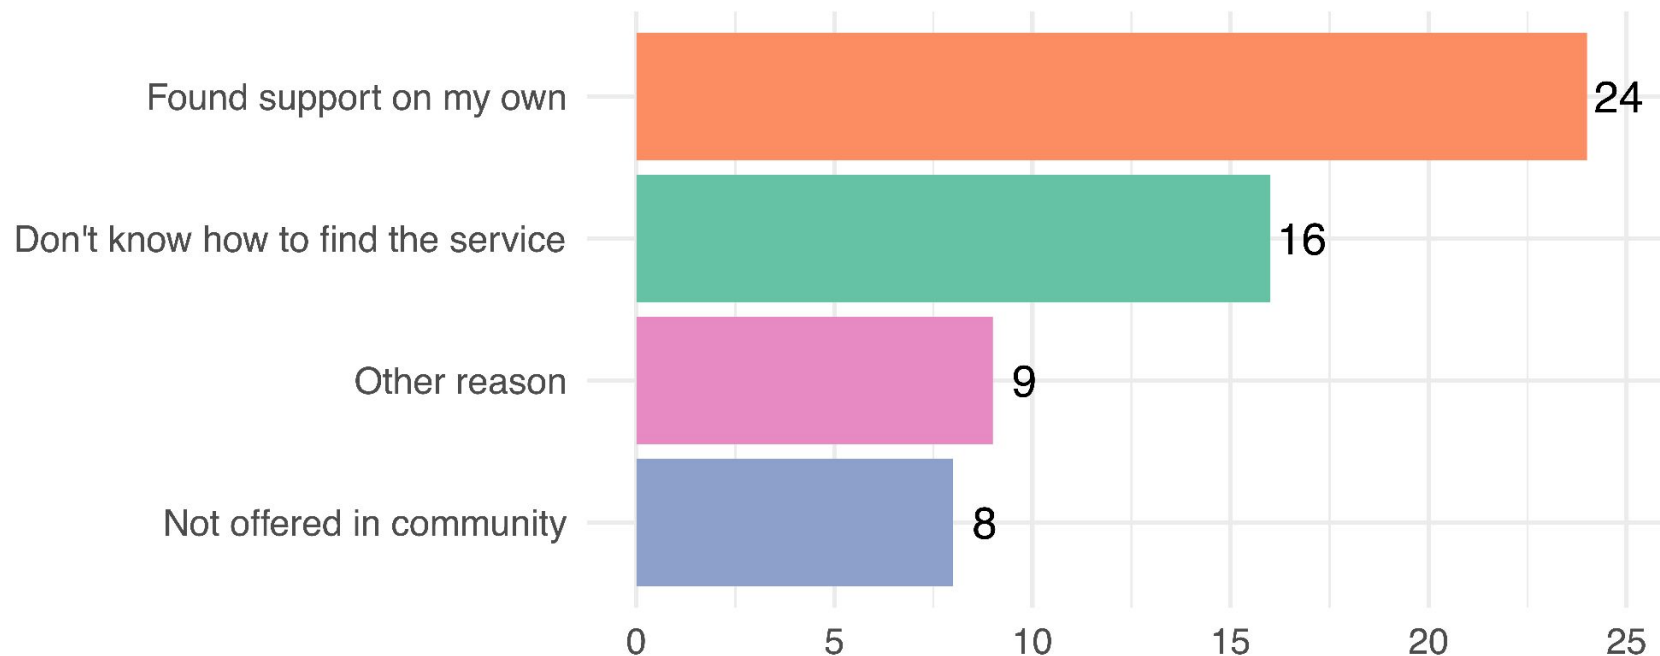

- Many individuals didn't know how to find the service.
- 13 responses had text answers: 2 referred to financial concern, 2 did not know about the service, 2 were unable to find the service, 2 were impacted by the pandemic.

Why people aren't using Transportation Services

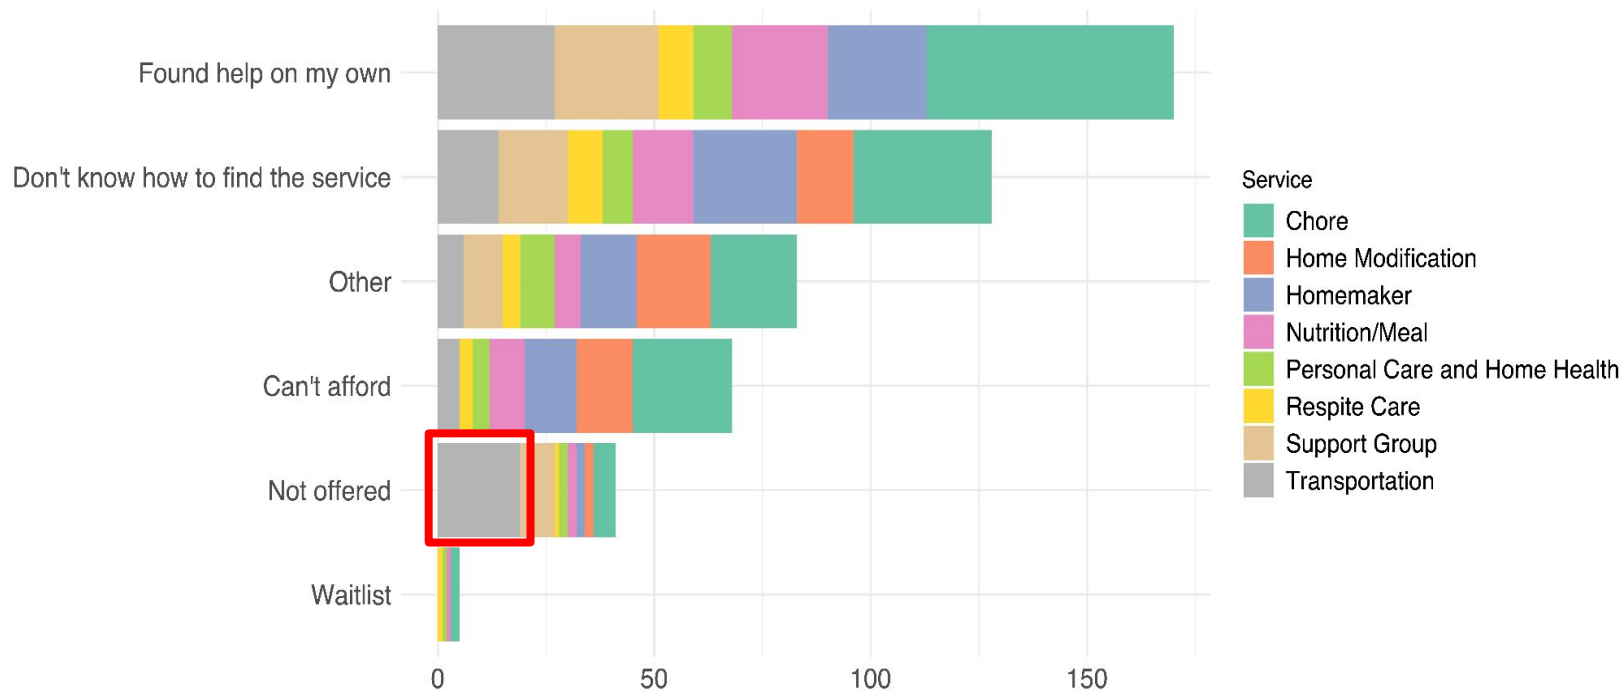

- Most people found help on their own for transportation service needs.

Why people aren't using Support Group Services

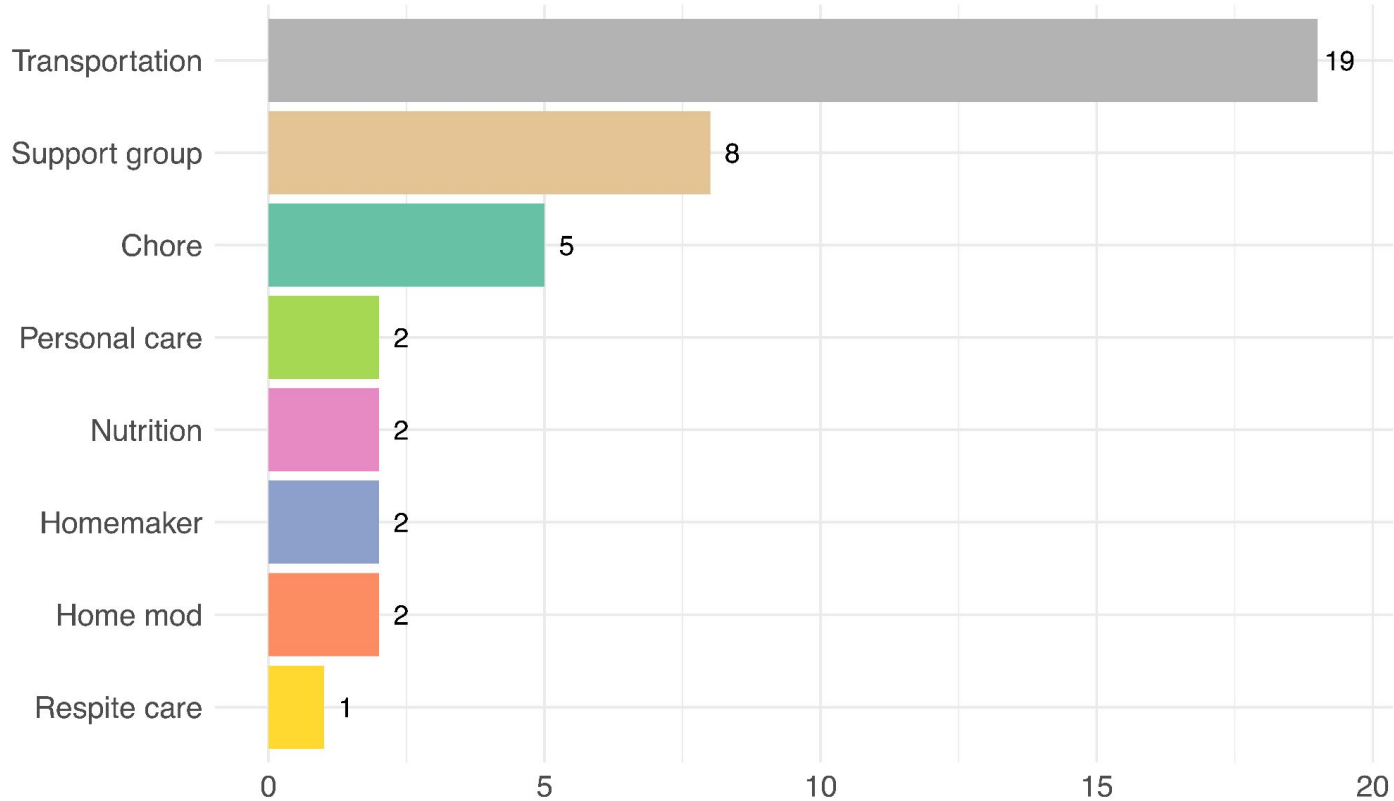

- Similar to the other services, many people found help on their own, with a sizable group of people not knowing how to find the service.

Why they aren't using the services

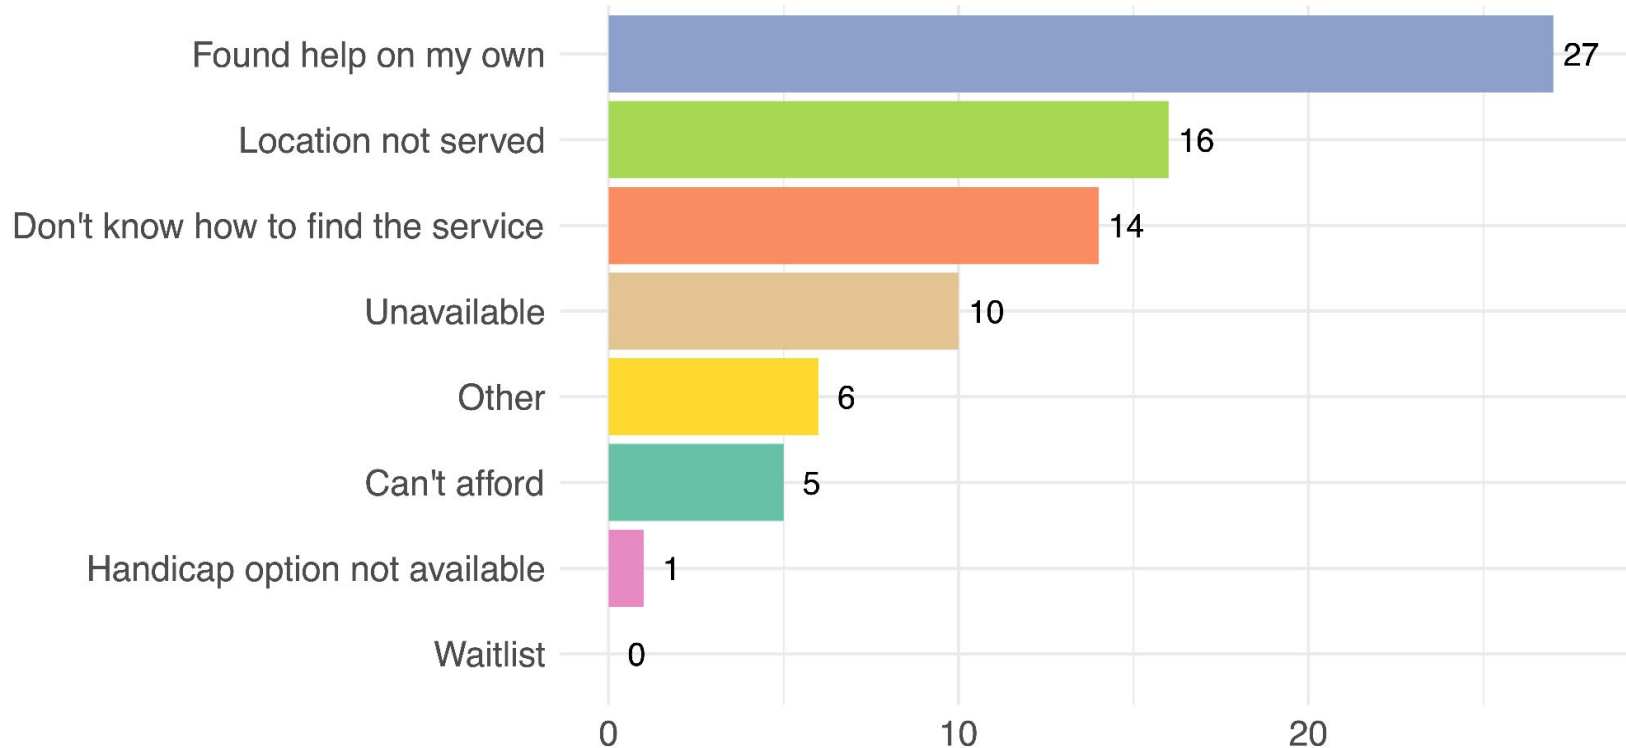

- Most people found help on their own or could not find the service.

Needed services but not available

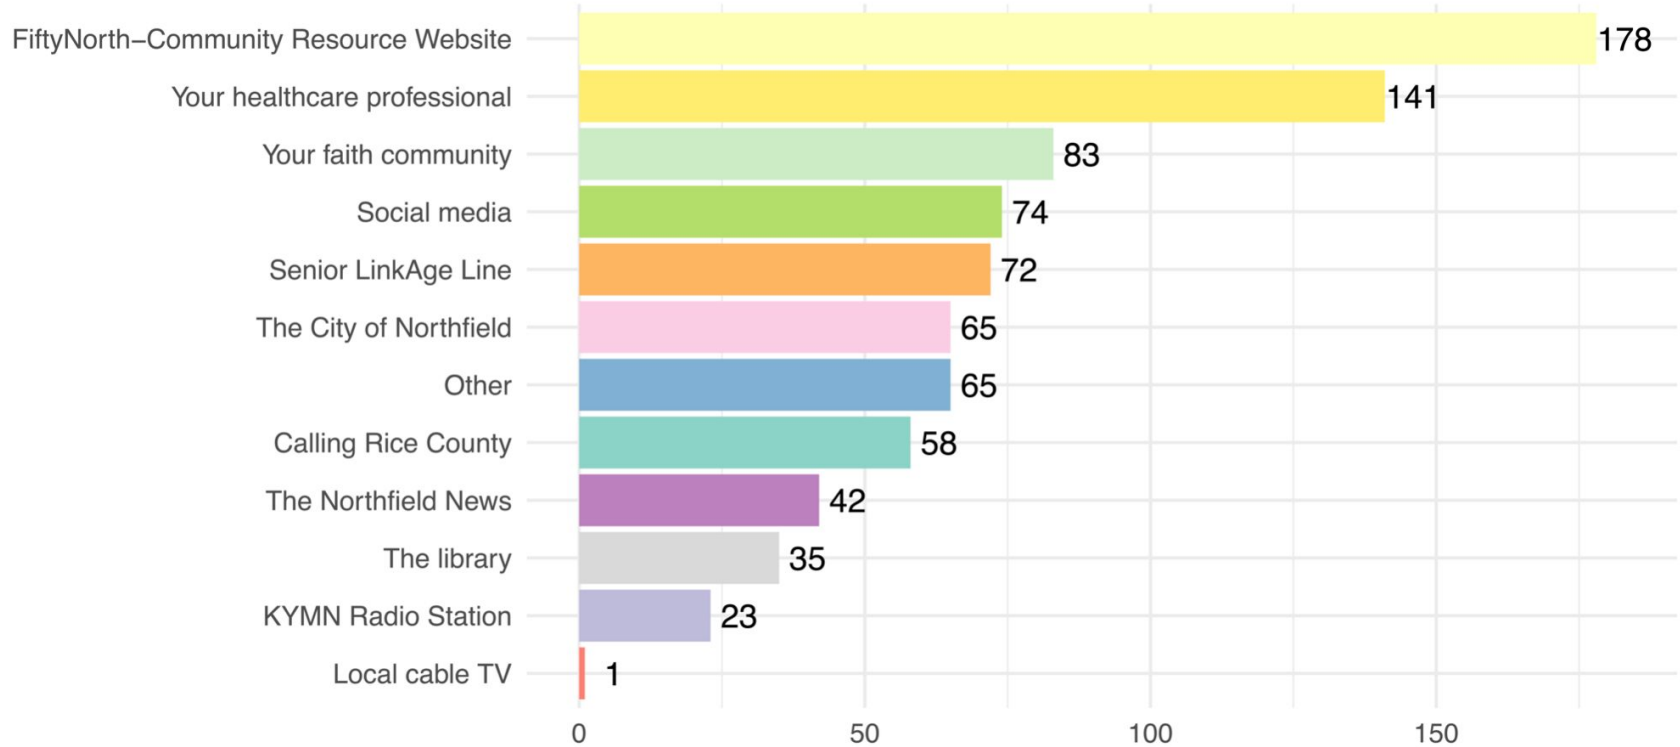

- Transportation services stands out as being indicated as unavailable.

Why people aren't using Transportation Services

- Most people found help on their own for transportation service needs.

Resources used to find services

- The top 3 resources for finding services are FiftyNorth, healthcare professionals, and faith communities.

Resources used to find services: text responses

- 64 total text responses
 - Internet search, such as Google (17 responses)
 - Family/friends recommendations (23 responses)
 - Hospital/doctor recommendations is not included in some people's top 3 resources, but they also included in their text responses indicating healthcare professionals
 - Also: shovel downtown sidewalks and keep the street plowed along the curbs. More consistency on snow removal in shopping areas is needed.

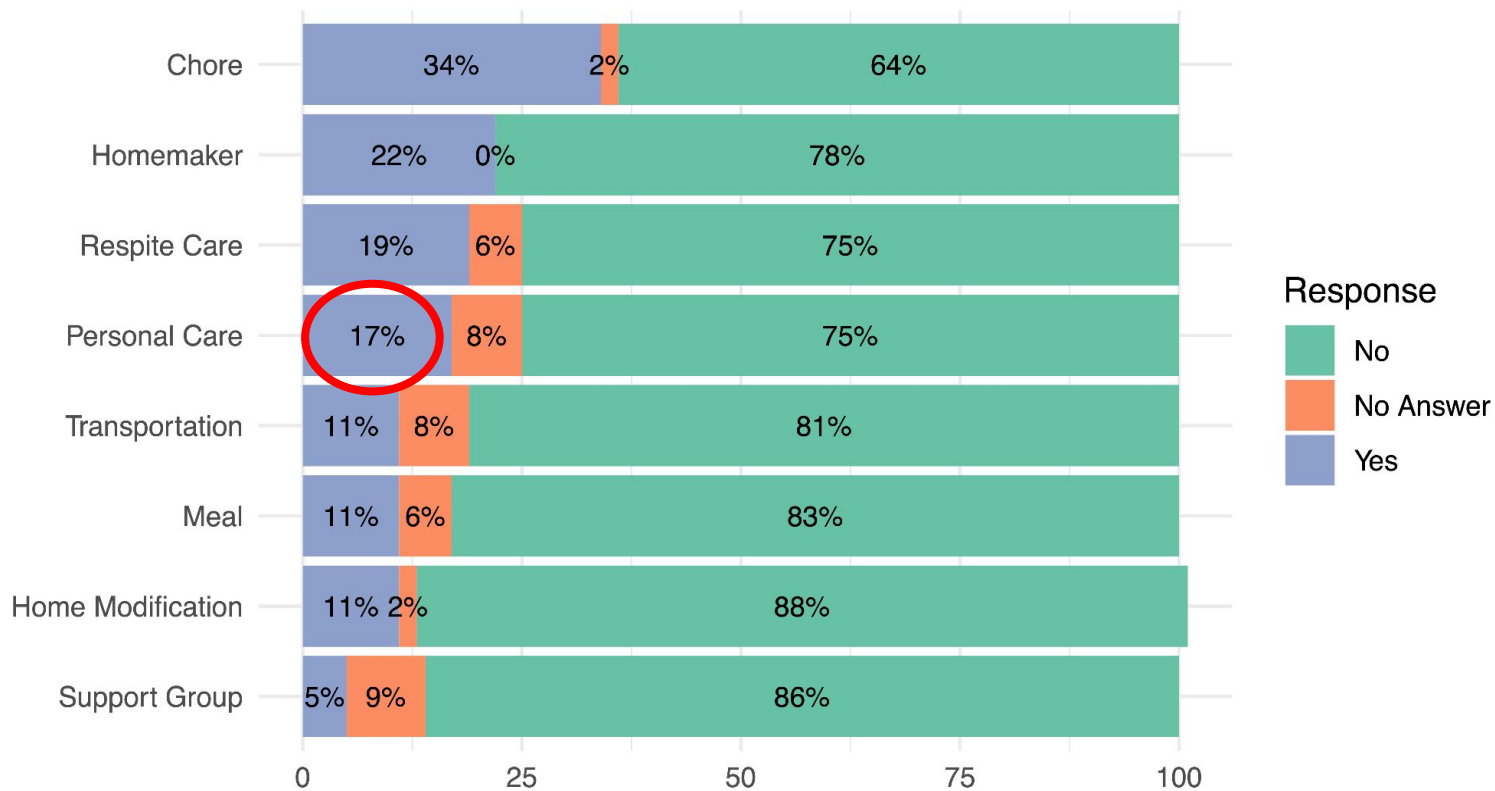

Overall analysis

- The 4 services which appear to need the most development are **chore, transportation, support group, and homemaker services.**
- Most people **found help on their own** for why a service was needed but not used, but the second common reason was that they **don't know how to find the service.**
 - **Chore services** were the most needed but not used service; however, this could be because it was the most popular service.
 - **Transportation services** were indicated as being the most unavailable, but this also could be due to the survey having 3 separate options for how this was unavailable.
 - **Support group** services were both needed but not used, and unavailable.
 - **Homemaker** services were needed but not used, but were not deemed as highly unavailable.
- Based on the counts of people answering the questions, **chore services and transportation services** are especially in need of development.

Caregivers and their differences from the overall responses

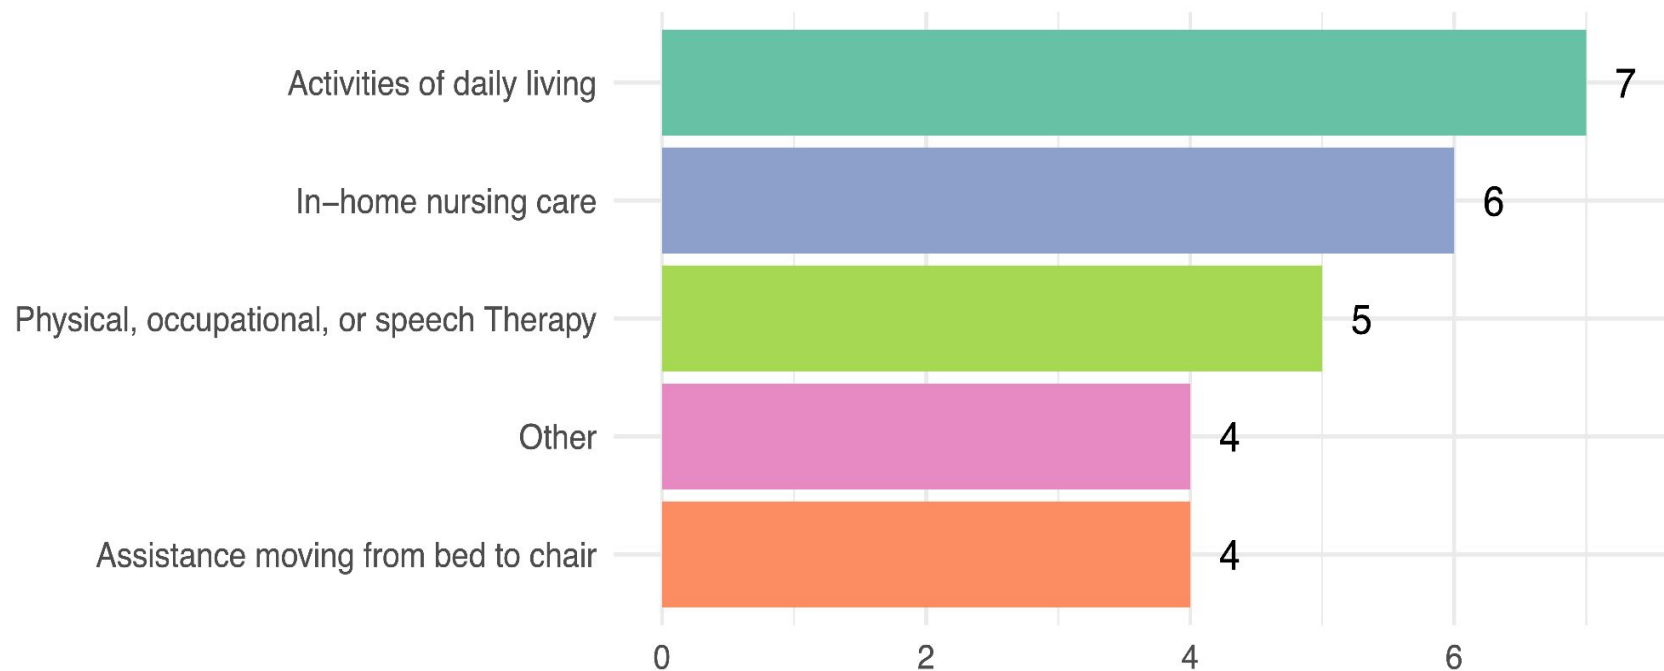

- Understand what service people are using and specifically what type within that category
- Understand what service people may need, but are not using, and why they aren't using it.
- Determine which services are most needed but not available.
- Determine what resources people use to find services.

What services caregivers are using

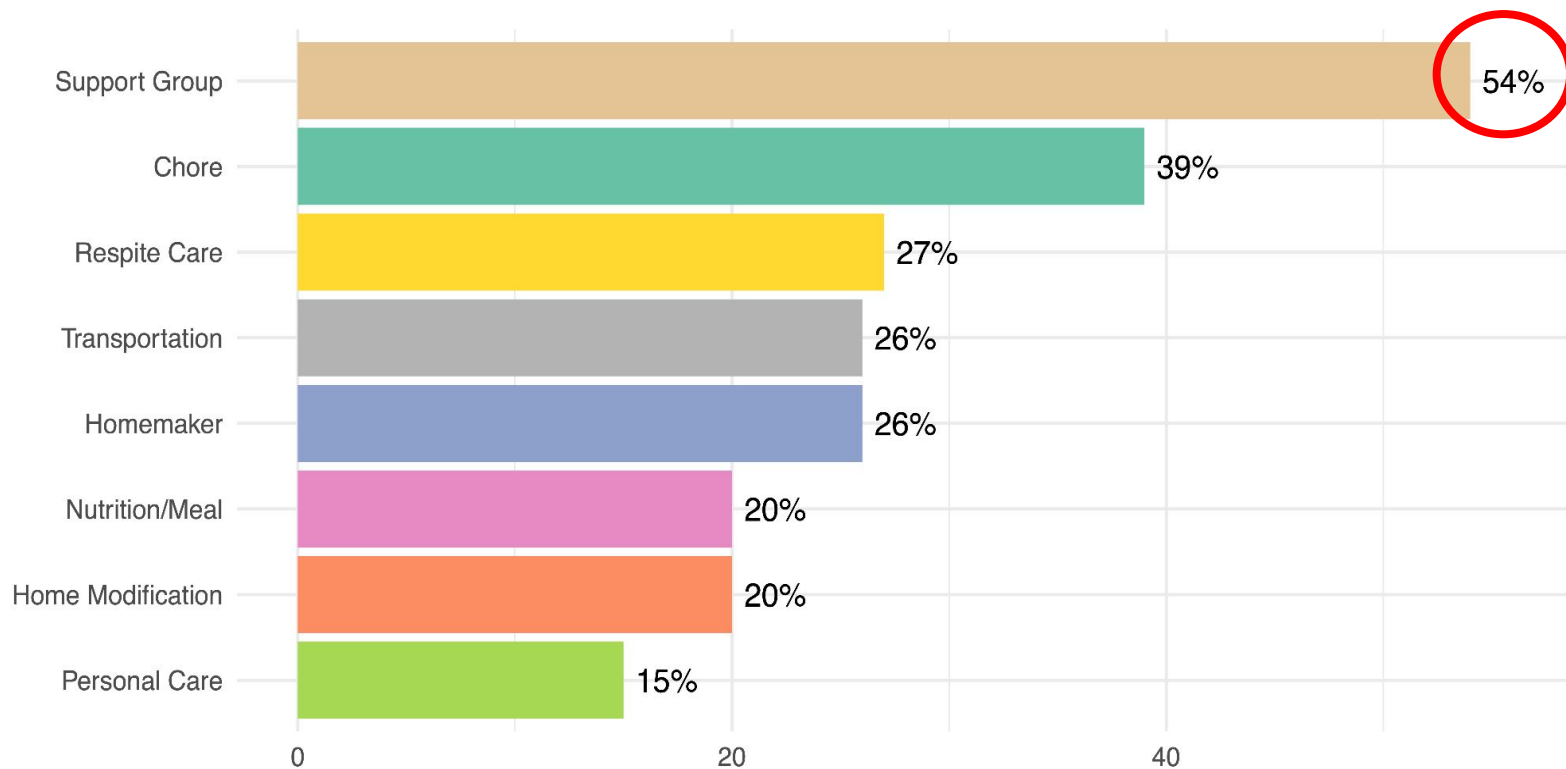

Caregivers are the main users of personal care services.

Personal care services used by caregivers

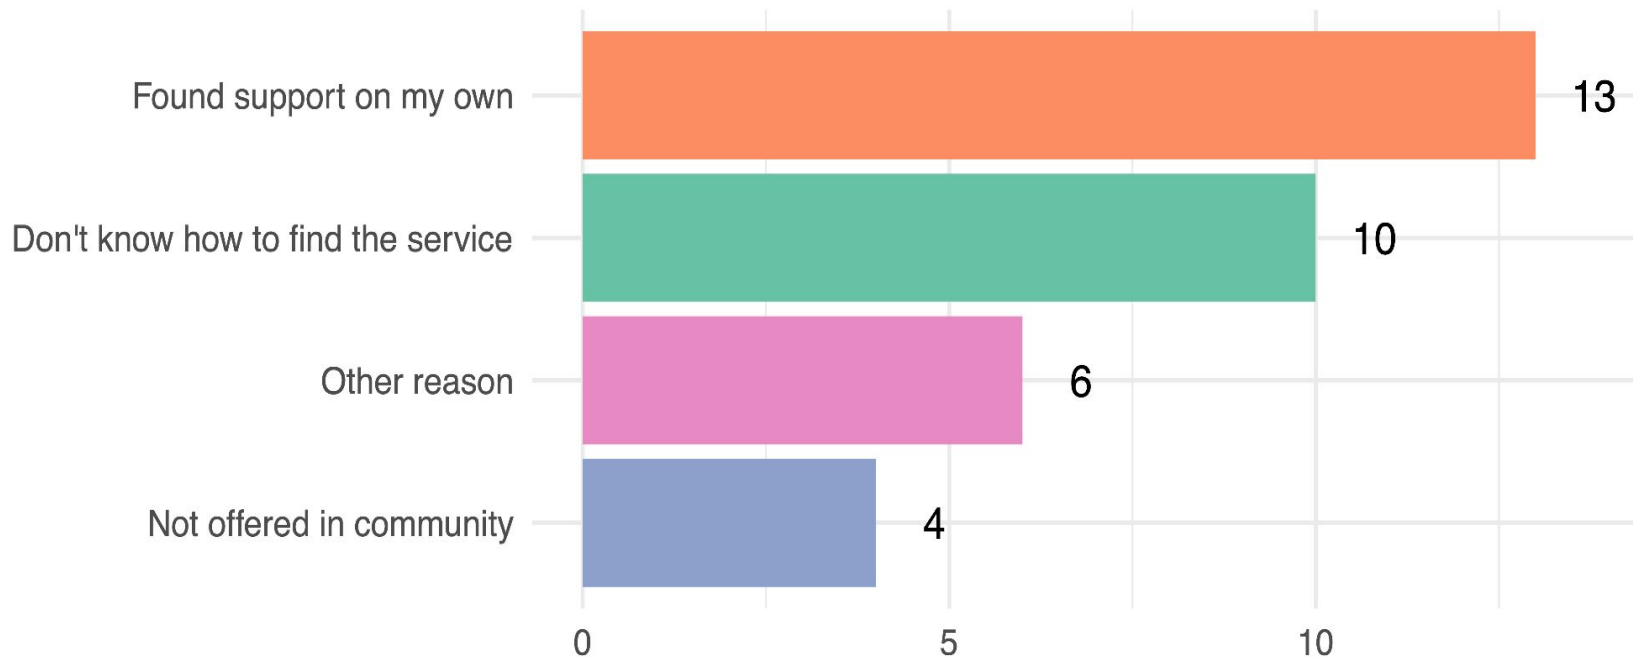

Caregivers evenly used the personal care services, with activities of daily living slightly being the most common.

What services caregivers may need, but are not using

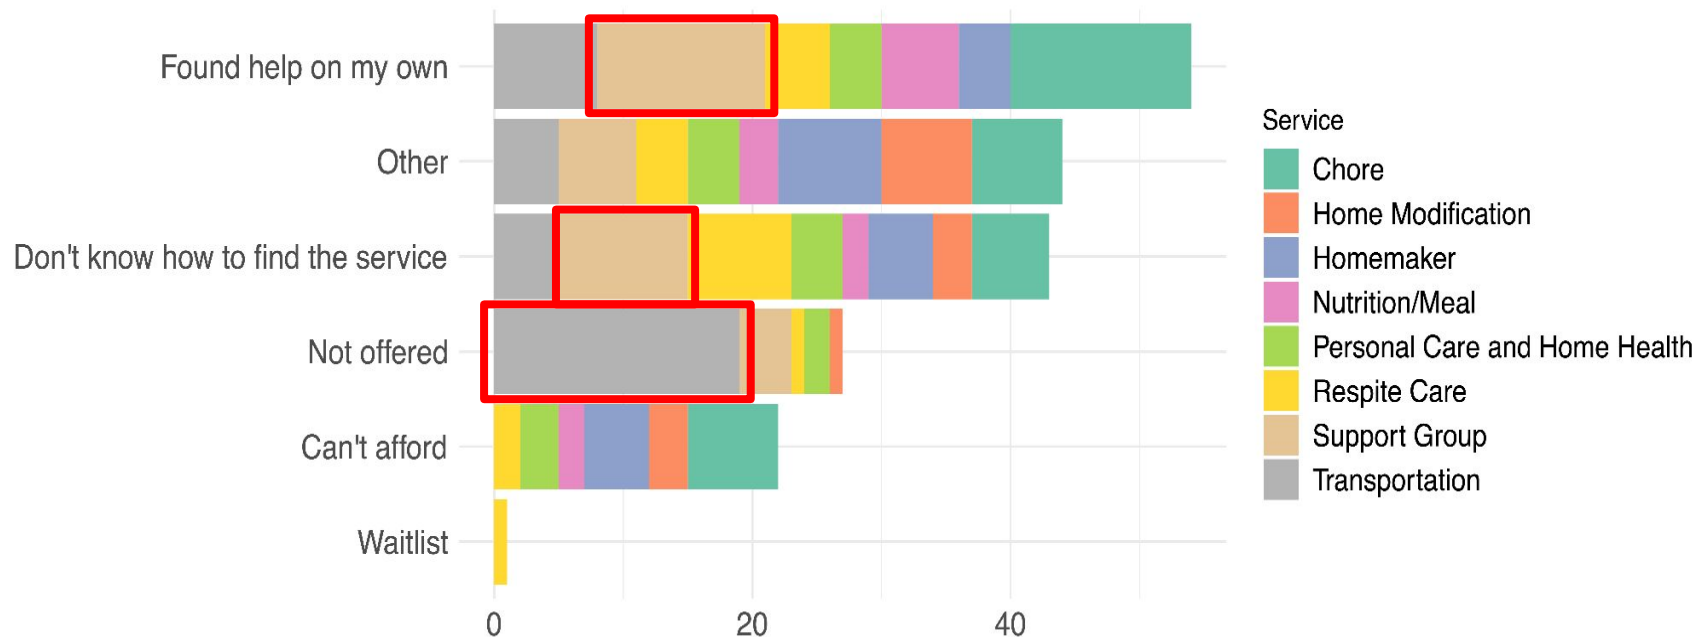

Caregivers need support group services the most.

Why caregivers aren't using Support Group Service

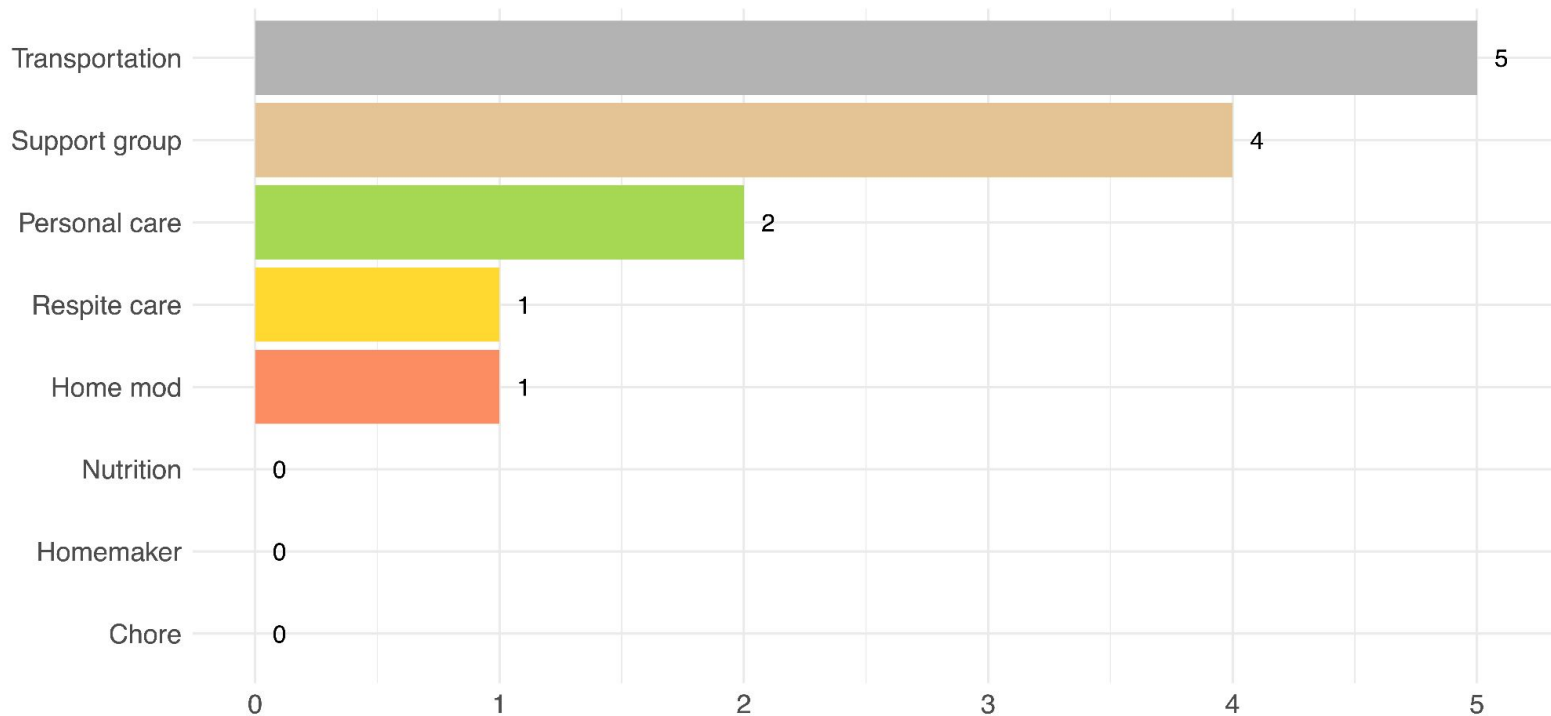

Finding support on their own is still a primary reason for not using a support group service.

Why caregivers aren't using the services

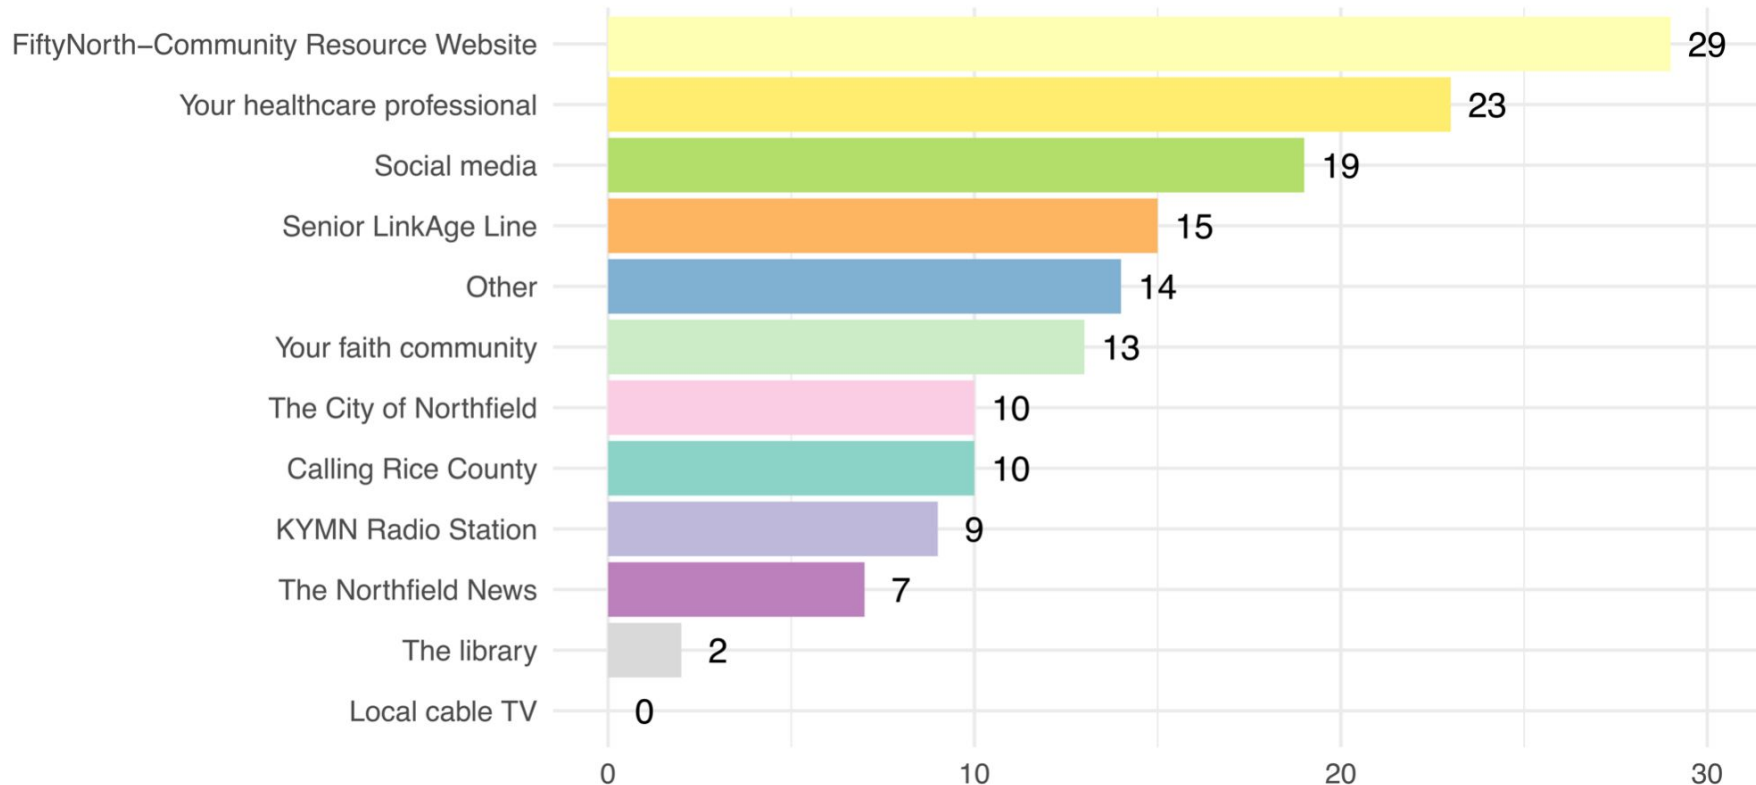

Support group services and transportation services are also big issues for caregivers.

Services caregivers need but not available

Caregivers still indicated that transportation and support group services were needed but not available.

Resources caregivers used to find services

Friends/Family recommendation, Internet searching, and hospital/doctor's recommendations are still the most popular answers in text boxes.

Faith communities are not a primary resource for caregivers.

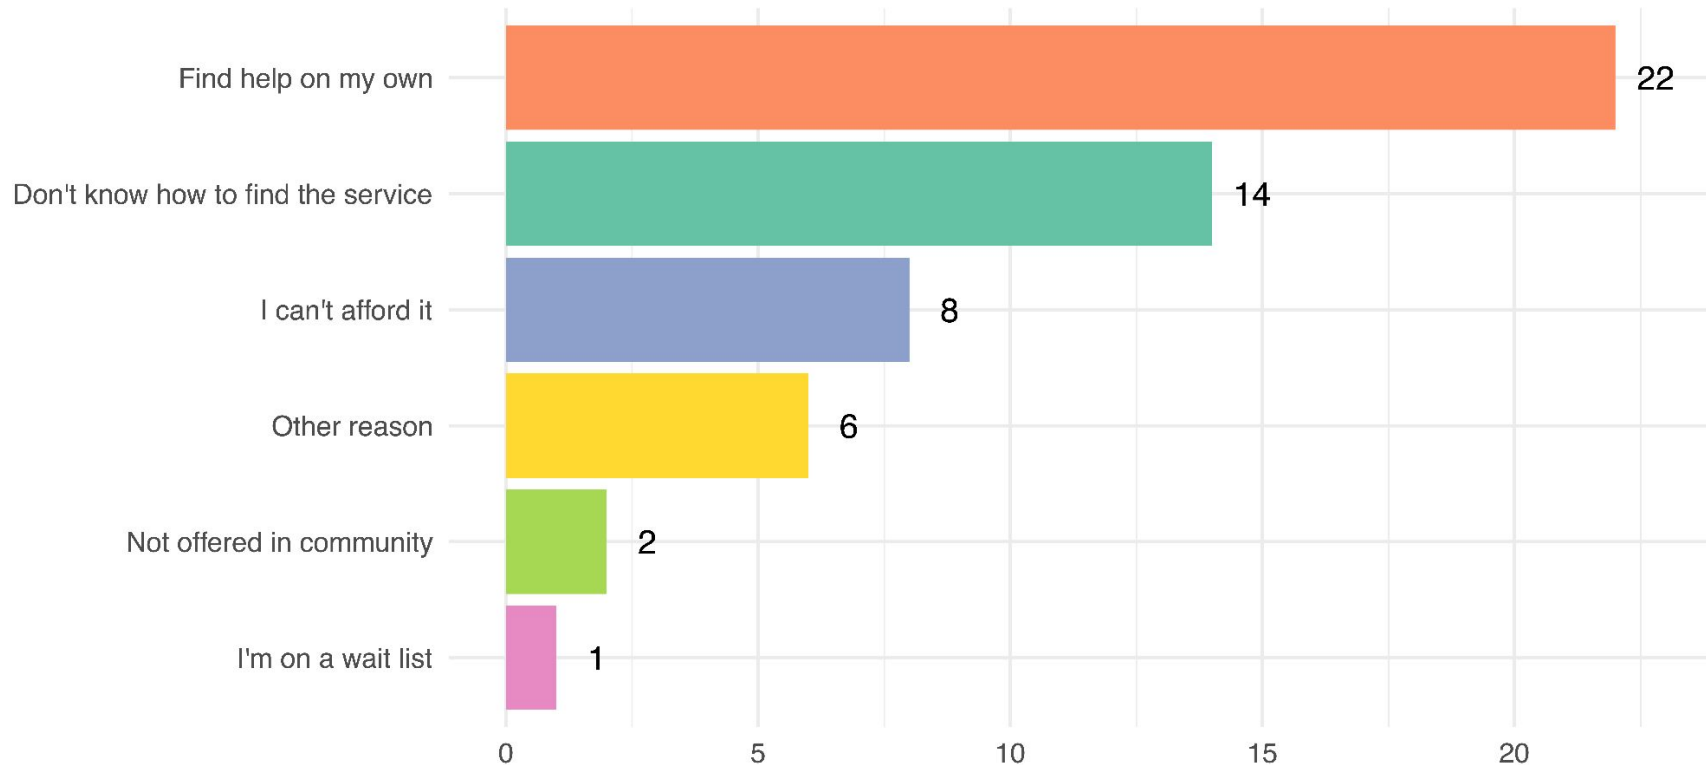

Caregiver Analysis

- Caregivers are facing the same problems as mentioned before.
 - **Support group services** were the most needed but not used service.
 - **Transportation services** were also indicated as being the most unavailable.
 - **Chore services** were also indicated as being highly needed but not used.
- For caregivers, **support group services** are especially in need of development.

Appendix: Demographic Information and More

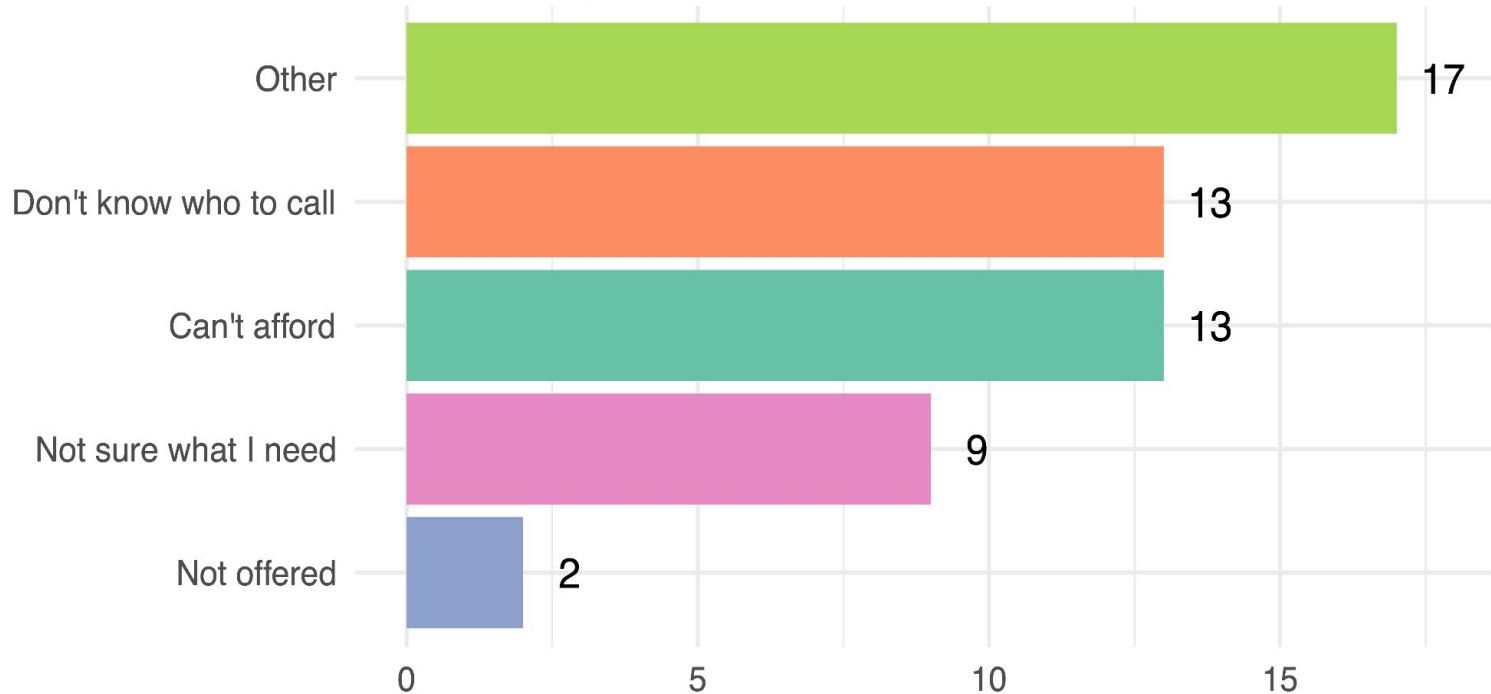

There are also 14% of responses needed service but not use for Nutrition service, and 13% for Home Modifications. Here are the plots. We also found out that only one person was on the meal waitlist.

Why people aren't using Meal/Nutrition Service?

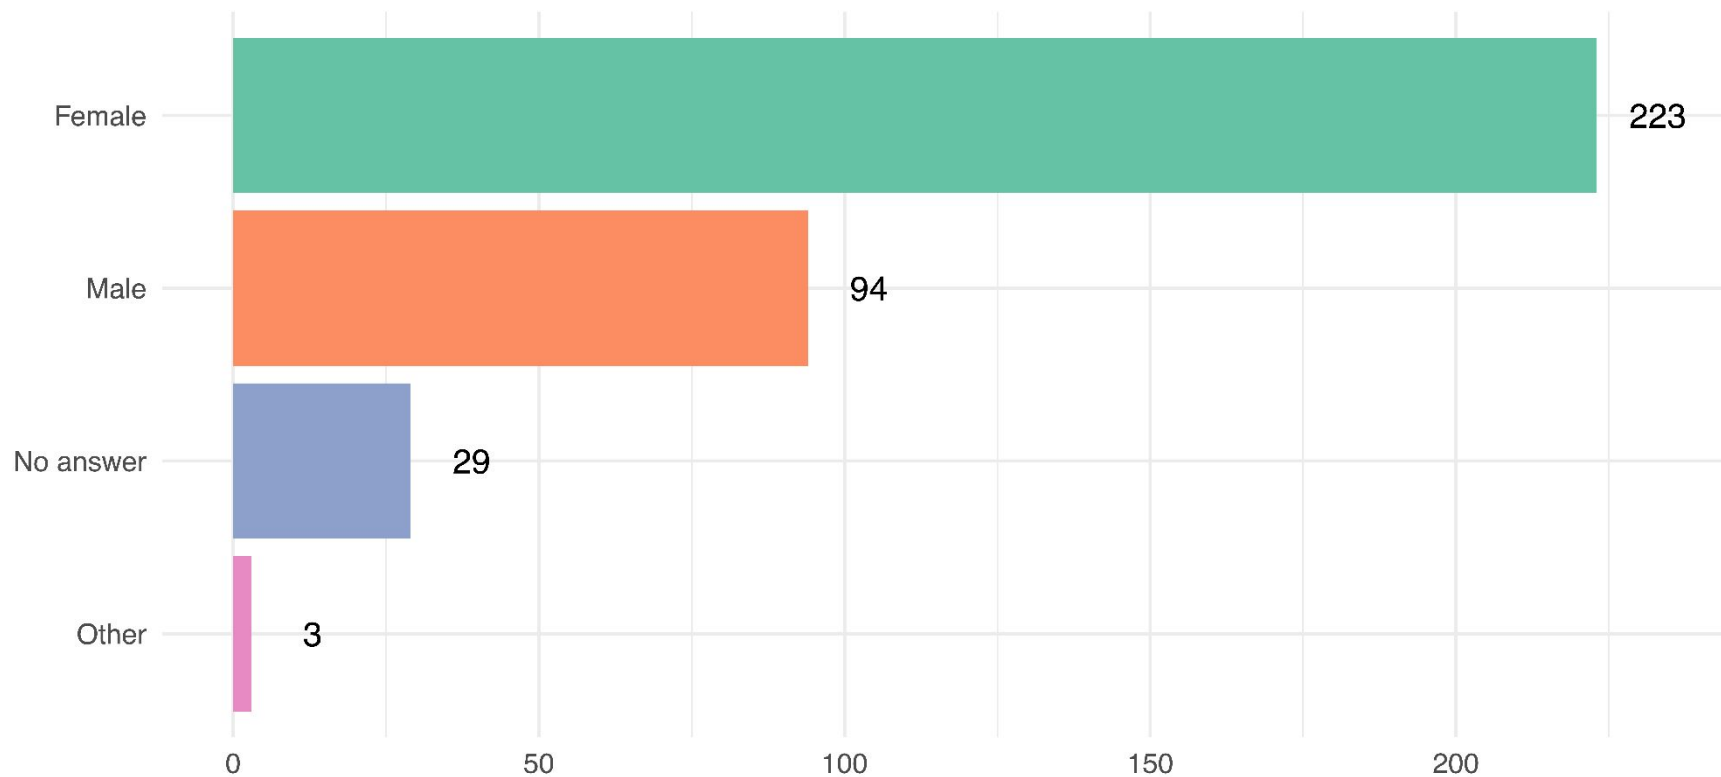

Only 1 person is on a wait list

Why people aren't using Home Modification Service?

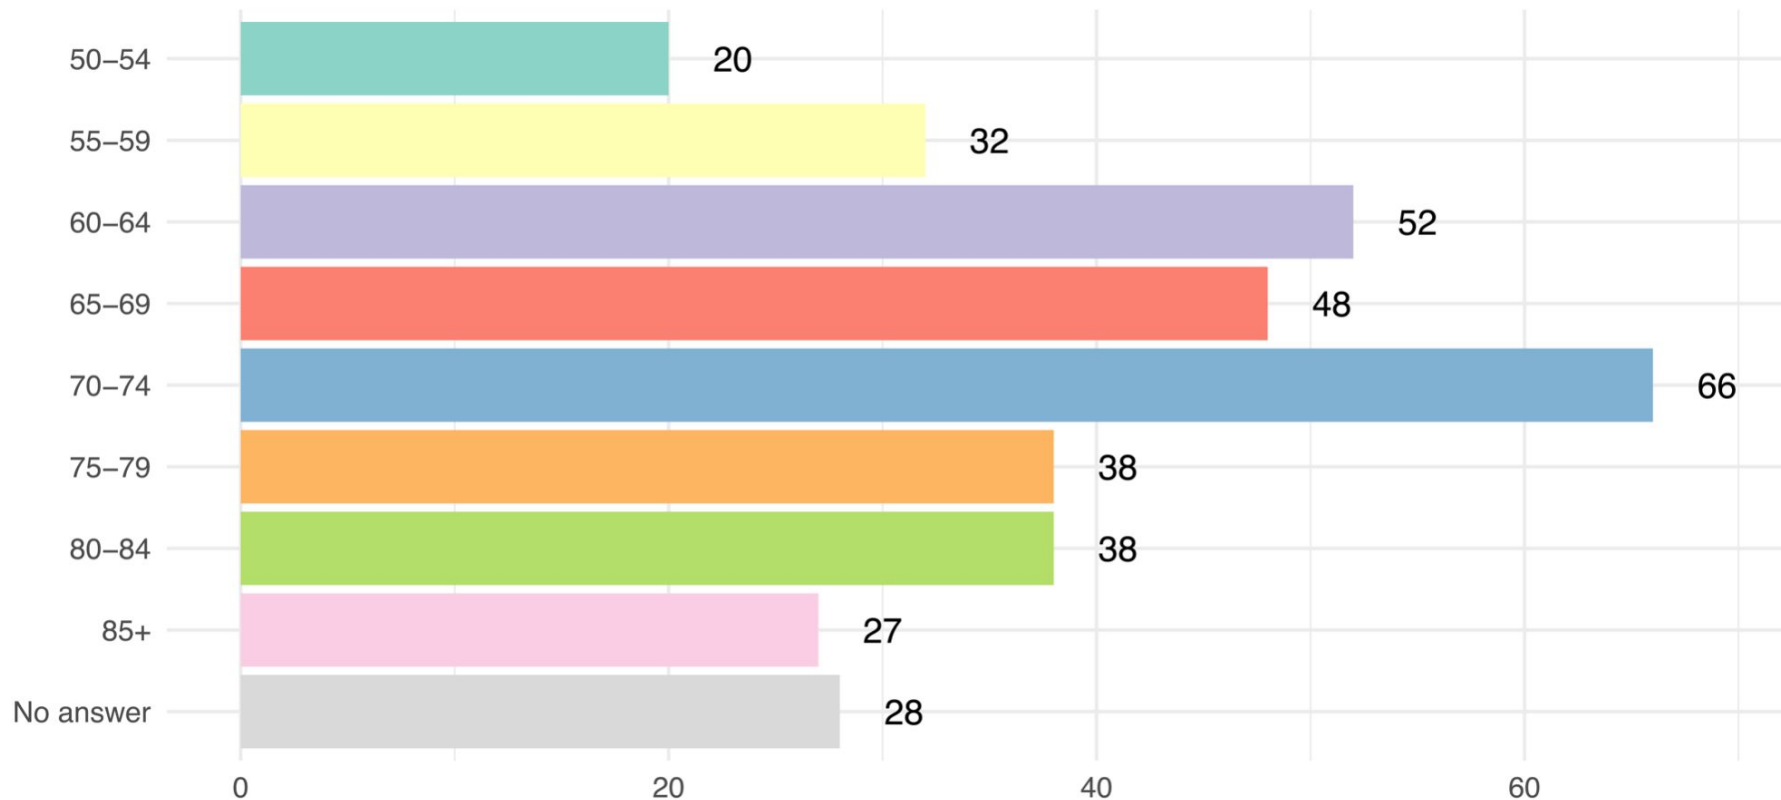

17 text responses: 3 about haven't gotten to it yet, 3 about the service did not come, 2 about covid
